Summary

Full Stack Web Developer with an affinity for problem solving. With a background in Philosophy and Project management, effective at finding solutions needed to create intuitive and functional web apps.

Quick learner with a passion to absorb knowledge and tackle challenging projects.

Technical Skills

Languages/Libraries: HTML5, CSS3, Javascript, JQuery, Bootstrap, Mocha, Chai, MySQL, MongoDB, Express, NodeJS, ReactJS, Selenium, Git,

Familiar with: Web Content Accessibility, Bash, PHP

Projects

Resource Center | <https://github.com/broken-guitar/project-3> | <https://nameless-peak-44869.herokuapp.com/>

- Functional onboarding application where employees can add resources and helpful links to the dashboard to help familiarize new hires with their coworkers and job place. Full C.R.U.D. app with user login and authentication functionality.
- Responsible for user login/authentication functionality and backend user data structure. Handled most of the backend api calls to Mongo Database storing user info and data. Simple UI tests. Project Management and planning during team workshops.
- M.E.R.N Stack, React Bootstrap, bcrypt, cookie-parser, js-cookie, Axios

FridFood | <https://github.com/atrodoni/FRIDFOOD> | <https://secret-savannah-64609.herokuapp.com/>

- Web application that allows users to sign in and add items to their “online” fridge and uses an API to search for recipes that contain the ingredients that users have in their fridge. Intended as a tool for people stuck inside due to Shelter In Place and had to get creative with the items in their fridge/pantry.
- Responsible for backend database integration and API calls, delivering desired data objects to front end developers for front end integration. Took care of REST API and use of recipe API. Handled troubleshooting, minor testing before deployment.
- MySQL, handlebars, Firebase, jQuery, Axios, Bootstrap

Google Books API | <https://github.com/atrodoni/Google-Books-DB> | <https://googlebookssearchmern.herokuapp.com/>

- React web application where the user can search for books using the Google Books API, look at the books found and save them for later viewing.
- Responsible for the whole app. Backend database, REST API, Front End Components,
- M.E.R.N Stack, ReactJS, Google Books API, Axios, React Bootstrap

Experience

Project Manager

July 2020 - Dec 2020

Earthwise Energy Solutions

Handle incoming sales leads and manage their growth into clients through the process of purchasing solar systems, design, installation, grid interconnection and monitoring. Scheduling, planning and handling material needs for each job with multiple sub contractors, clients and jurisdictions. Ensured projects completed on time and within budget. Developing an ongoing project to create a custom Solar installer project flow program/software. Onsite/Remote troubleshooting and maintenance of installed solar systems.

Project Manager

Sept 2016 - Nov 2019

Northgate Garage Doors, Inc.

The face and voice of the company. Oversaw sales, customer service, scheduling, planning, and development of projects from beginning to end. Solving problems on the fly using available resources efficiently and providing cost effective solutions for company's everyday needs. Lead the implementation of new software into daily workflow and handled the streamlining of workflow processes from beginning to end. Worked with customer support of new software to fix bug issues. Ensured projects completed on time and within budget. Diagnosed/Solved issues remotely/onsite to save overhead cost and make way more lucrative projects and clients. Started working on a Garage Door database helpful to individual vendors.

Field Service Technician

July 2014-Mar 2016

Lottery Services of Georgia

Installed, maintained, and serviced lottery network equipment, satellite dishes, terminals, vending machines. Facilitated installation and integration of new hardware into the lottery network. Fixed parts at home when repair staff was overloaded with work to make sure I would have working parts in the field for my next shift. Intimate knowledge of lottery equipment and networking allowed efficient and effective onsite/remote fixes to further increase productivity and lottery sales statewide.

Education

Bootcamp Certificate: UC Berkeley Extension Full Stack Web Development Jan-July 2020

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars.js & ReactJS.

B.A in Philosophy : San Francisco State University, San Francisco, CA

2013
